# Wikipedia

---

Wikipedia is a Python library that makes it easy to access and parse data from Wikipedia.

Search Wikipedia, get article summaries, get data like links and images from a page, and more. Wikipedia wraps the [MediaWiki API](#) so you can focus on using Wikipedia data, not getting it.

```
>>> import wikipedia

>>> print wikipedia.summary("Wikipedia")
# Wikipedia (/wkpidi/ or /wkipidi/ WIK-i-PEE-dee-) is a collaboratively edited, multilingual, free In
```

Go to the [quickstart](#) to start using wikipedia now, or see the [api](#).

---

## Indices and tables

---

- `genindex`
- `modindex`
- `search`
